Experience In Taiwan

I.1: Course subject

6 months had passed so pretty fast and TEEP scholarship has ended too. First, I am very grateful to avail this scholarship for me to experience the taiwan's education, unfortunately there were a little bit adjustment to do however it was already given especially for us, foreigners so be it.

I'm taking up Master Degree in Nanhua University under Green technology for Sustainability. When you heard this course it is something new somehow interesting. We tackled about environment and different areas of learning such as civil engineering, agricultural and science related courses. Indeed, a little bit harder for me since everything is new except to agricultural subjects since I am agriculture student graduate. After those struggles about the new subject, I am still glad because it is a new learning for me, to learn about soil not for agriculture but about the pavement and establishments. With those "experiments here and there" were such a good learning since we're doing it practically. We were so lucky with our all professors, they are so kind and never get tired to teach us. They always inspired us and trying their best to inculcate the knowledge we need.

(a) Experiments about the soil and pavement

It's been a great privilege for us to learn about the bees and black soldier fly and of course about the circular economy also. We were exposed to speak in front because there were always a reporting with that we boost our confidence or level up our stage presence.

(a) It was my first time to touch the larva of Black Soldier Fly.

(b) My first encounter with the “perfect insect”, Bees.

II.2:Conference

It was October 21-22, 2018 when we had our first international conference. The 2nd

SDGT international Conference 2018. We had the chance to listen and to learn about the studies of the presentors came from different countries. Indeed, it was great experienced. Thanks to professor Hong!

(c) SDGT 2018!

II.3: Taiwan Tour

Yes, Taiwan is the best when it comes to food, people and sceneries too. I like the breeze of the air, the green environment, infrastructure and many more. I am always be grateful of being part of this scholarship program without this I haven't experienced the beauty of Taiwan. Last December 16, 2018 we had a tour in Sea Go and Alishan Mountain. It was a two days trip. After with all the reports and hectic schedule we had a time for chilling out and relaxed even in a moment. We had so much fun together with Green technology family! Thanks to government of Taiwan for sponsoring us as well to those people behind this event.

Green Technology department at Sea GO.

(e) Alishan Mountain trip

And recently, we had a butterfly tour at Maolin. Thanks to the administration of Maolin National Scenic Area and their tourism for the free tour and accommodation. There, I have learned about the kinds of butterfly and experienced the marking of butterfly. I involved myself also in helping our environment trough tree planting there. Fortunately, I have fun and have time to bond with local and foreign people.

(g) the 3 of us, from Philippines during the butterfly tour.

II.4: Internship

We have the opportunity to work in the flower farm at everleader flower farm. We do the weeding, transplanting, bagging, fertilizing and arranging. It wasn't easy, of course there is no work that comes in easy way, and you always need to do the hard work. Well, it is great experienced also especially for us as agriculture student, somehow we learned that there is a money in a flower. I know, this learnings that we learned we can use it in the future.

III. Conclusion

Taiwan's experienced education program brought me an experienced nothing can compare with, with all those learning's that I have learned and with all those the knowledge I have earned and with all those moment are cannot be paid. I could not say that it is the best among the best but one of the best. So, I would like to give thanks and appreciation to professor Hong and Taiwan Government who is always supporting us and behind this scholarship program. Thank you, Thank you! May this program will lasts.
