Acknowledgement

First of all I am grateful to almighty Allah for empowering me to complete my experience report and successfully submitted the report.

I have a great pleasure to express my deepest sense of gratitude and indebtedness of my reverend teacher **Yao-Ming Hong** Ph.D. (Professor and Director), Department Green Technology for Sustainability and Sustainability Center, Nanhua University. For his constant guidance, keen interest, valuable suggestions and inspiration which he had given me throughout the progress of the work. Finally, I would like to show gratitude to Taiwan Government also Taiwan Education Ministry for give me such a wonderful opportunity to study in Taiwan.

I am extremely grateful to him for inspiration me.

Md. Nazmul Aunsary
Department Green Technology for Sustainability,
Nanhua University

First semester, when I was came from Bangladesh basically I was confused. Because I am new in Taiwan. I don't know Taiwanese people also Taiwanese culture language and food. But after someday I feel Taiwanese people they are very good human being. My Department head, all staff also other Professor

they are very helpful and friendly. I'm really happy for their behavior. My head of the Department Professor Yao-Ming Hong, he help me every step in my Taiwan life. First semester I gather lot of knowledge about sustainability and green technology also I introduce with Taiwan culture. Professor Hong was mange a teacher for us to learn Chinese language. In first semester we learn many thing such as, How to protect our nature, how to reduce carbon emission, how to protect our water, environment etc. Also in first semester professor buy lot of bee box for us. Bee protect our environment. We learn how to maintain bee.

Today, proponents of honey tout its miraculous healing properties, claiming that it can prevent cancer and heart disease, reduce ulcers, ease digestive problems, regulate blood sugar, soothe coughs and sore throats, and increase athletic performance.

Conference: Professor Hong give us opportunity to join 2nd SDG international conference 2018. I learn many thing from SDG conference and I'm really motivated from that conference.

After finish the SDG conference Professor arrange a study tour. We visit Gold Joint industry we learn many thing from gold joint industry. Such as how to protect nature and low carbon emission.

Also I attend CSR conference 2018 and getting 4th position. Arranged by CTCI Education foundation Taiwan.

Tour in Taiwan: My first tour was at Taipei 101 building, then I visit Elephant Mountain, Taipei National Zoo, CHIAYI Sea beach, Ali Mountain, Maolin Butterfly. I enjoy very much my first semester.

Practice internship: Our head of the Department Prof. Hong arrange an internship program in winter vacation. I work for a mechanical company in winter vacation and I learn how to do real work.

Conclusion: I want to say I am really lucky for my head of Department look like my father. He always help me my every step. Taiwan is a beautiful country also called Heart of Asia. I believe Taiwanese people are very good. At last, I don't know how to thanks but thank you very much Taiwan Government, also Nanhua University give me opportunity to come here and continue to support me to continue my study.
